

This Presentation serves as a time capsule, documenting the last few historic months that have been an emotional rollercoaster for me and many others. I hope each of you took something away from this, because I most certainly did. We are all experiencing history. This year has been absolutely unexpected, difficult, and full of uncertainty, but none of us are going through this alone, because ALL of us are going through this together. We may have missed out on the spring semester at school and many other memories we wished to have made. It may have been scary then and even now to turn on the news and hear about how much our world as we know it, has changed, and to hear about how many people are suffering. Many have lost loved ones, and seen much suffering. Even one of my teachers at USD has Corona. This time period is blatant uncharted waters and whether we are in school this coming semester or online, we will make it through. Our world is not the same anymore and I don't know if "normal" will ever be the same, but we will make it through and eventually we will all be reunited again.
